WULFRUN.

MANAGEMENT CONSULTANCY

Safer Place 360 Review

A practical assessment and action plan for places affected by repeat anti-social behaviour, insecure access or safety concerns.

One place. A clear route to improvement.

For housing providers, councils, managing agents and place managers who need to understand what is happening, decide where to invest and coordinate the work through completion.

WHAT THE REVIEW COVERS

1	**Understand**	Review available incident and complaint information, speak with relevant people and visit the location.
2	**Identify**	Assess access, boundaries, lighting, sightlines, upkeep, reporting and management responsibilities.
3	**Plan**	Set out proportionate quick wins and longer-term measures, indicative costs, owners and a practical delivery sequence.

What you receive

A concise place risk profile, a prioritised action plan with indicative costs and responsibilities, and a route to implementation. The scope, timescale and fixed fee are agreed before work begins.

EXPERIENCE IN PRACTICE

Residential access and ASB

A review brought together access repairs, boundary improvements, environmental work and parking management. The managing organisation reported incidents falling to zero after the interventions.

Heritage civic building

A council and architect secured consent to reinstate gates at a heritage building, addressing recurring misuse, maintenance pressure and concerns for staff and visitors.

The experience behind Wulfrun includes leadership of six Home Office Safer Streets programmes and management of £5.5 million in government investment across policing, local authorities and housing partners.
